Welcome to the 5th World Congress of Health Economists!

Dear Colleague,

On behalf of all who have made this World Congress possible, welcome to Barcelona –the capital of Catalonia, at the heart of the Spanish Mediterranean.

Four years ago in York, the Board of Directors asked the Barcelona group at Pompeu Fabra University and the Center for Health Economics Research (CRES) to take on the responsibility of organising the 5th World Congress. We received enthusiastic support from the Spanish Health Economics Association, which is now in its 25th year, and from Latin-American health economists in general.

This Congress follows the impressive precedents set by the conferences in Vancouver, Rotterdam, York and San Francisco. The Barcelona conference is set to be the largest and most intellectually complex iHEA Congress thus far, with more themes than ever, almost 2000 delegates from over 87 countries, close to 1500 presentations and a vital central theme – the relevance of health as an investment strategy for growth and human welfare. We hope that you will take the opportunity to share the views and experiences – both in and out of the lecture rooms –which will be offered to our academic community in the university atmosphere of Pompeu Fabra.

Two stimulating plenary sessions will be offered. One at the splendid site of Forum de las Culturas, featuring a discussion panel with Michael Grossman (National Bureau of Economic Research and City University of New York), Indira Hirway (Director of the Centre for Development Alternatives, India), and Xavier Sala i Martin (Columbia University and Pompeu Fabra University). The other stellar event is the closing plenary session at Palau de la Musica, a jewel of modernist Catalan architecture, with Daniel Kahneman (Princeton University), 2002 Nobel laureate in Economics, as the keynote speaker.

Special thanks must go to the iHEA Board, the Host Organizing Committee, Ivan Planas and all those who have worked behind the scenes – our public and private sponsors, the Scientific Committee, volunteer groups, CRES Board and UPF officials.

After so many months of stress in planning “Investing in Health,” we hope you enjoy not only everything the conference has to offer but also a bit of relaxation time in Barcelona, Catalonia and Spain to invest in your own health and welfare!

Enjoy the Congress!

I'm especially pleased to have the opportunity to welcome you to Catalonia for your 5th International Health Economics Conference. Given the significant medical culture of our country, quality of our health care system and the international impact

of our research, I am sure you will find it to be a perfect environment to exchange recent developments in your important field of health economics.

I am truly confident that your research will ultimately have a great impact on quality of life for all. With this in mind, I would like to thank you for choosing Catalonia as your destination of choice. I encourage you to take advantage of the scientific and cultural experience that this conference and our region offers you.

Local Transport

Barcelona has five metro lines covering a total of 80.5 km with 111 stations. It also has a city railway network which supplements the metro network. A fleet of 840 buses connects all the city's districts. There are a number of travel passes which can be used on public transport (metro, city railway and buses). These are valid for 1, 3 or 5 days. Barcelona has a fleet of 11,000 taxis which can be easily identified by their yellow and black livery. A green light on top of the taxi indicates its availability. The Metro is the easiest and fastest way of moving around the city. The nearest station to the Universitat Pompeu Fabra is Ciutadella/Vila Olímpica (line 4- yellow). For further information please visit the web page: www.atm-transmet.es

Barcelona Attractions

Barcelona is situated on Spain's beautiful Mediterranean coast. It is the country's second most important city, with over 1.5m inhabitants, and the economic and administrative capital of Catalonia.

Barcelona is world famous as a city of culture. Over 40 museums including the Museu Picasso, the Fundació Joan Miró and the Fundació Antoni Tàpies hold permanent exhibitions of works by the artists, as well as temporary shows. The world's finest collection of Roman-

esque art may be found at the Museu Nacional d'Art de Catalunya. Exhibitions of contemporary art are always on at the Museu d'Art Contemporani de Barcelona (MACBA) and there are numerous other art galleries and museums around the city.

Great architecture and design are characteristics of Barcelona and may be seen in its streets, squares, bars and restaurants as well as landmark buildings by Gaudi and other celebrated architects.

There are countless restaurants and bars to delight every taste and budget, from Catalan cuisine to world-class international dining. The city also offers exceptional shopping, especially for fashion and stylish contemporary design.

Barcelona has one of the world's most famous and charming funfairs situated on the mountain of Tibidabo, overlooking the city.

Beautiful public spaces, cinemas, theatres, flamenco performances, Europe's biggest aquarium, bullfights, art, music, popular festivals are just some of the entertainments on offer when you visit one of Europe's most exciting and culturally rich cities. iHEA 5th WORLD CONGRESS: Programme

Dear Delegate,

While you are enjoying the Barcelona Congress, we wanted to take this opportunity to invite you to the 6th World Congress, "Explorations in Health Economics," co-hosted by the University of Southern Denmark and Lund University in Sweden. The conference venue will be the campus of the Copenhagen Business School.

This is the first iHEA congress to be co-hosted by two different countries and we do hope that this will engender a fresh perspective on the health economics profession, hence the theme of the conference. Copenhagen is a medieval city with a dynamic cosmopolitan air. We think that you will find it a perfect setting to consider the future of health economics while drawing on lessons of the past. So ensure that you join us for the Copenhagen Congress.

We will work hard to continue a high quality scientific program and to guarantee a pleasant stay for all.

While we and our colleagues are here in Barcelona, please come meet us and take the opportunity to discuss the 6th World Congress.

We look forward to seeing you in Copenhagen in 2007.

Yours sincerely,

Terkel Christiansen

1900~2015		PLENARY Congress Centre <i>Plenary Speakers:</i> Michael Grossman Xavier Sala i Martin Indira Hirway AWARDS	Eyes on the Target: Shifting the Production Possibility Frontier through Health Investment When building a global strategy to invest in health - either by devoting international aid to LDC's or by increasing money from consumers and taxpayers - targeting should not be the exception but the norm. Indeed, aid needs to focus on selective population groups, such as family members truly responsible for the running of a family. Investing in health is much more than increasing health care spending - it must be focused on shifting the production possibility frontier of a society. Michael Grossman , Program Director of Health Economics at the National Bureau of Economic Research and Professor at City University of New York, has a significant amount of contributions to Health Economics, including, empirical applications of rational addiction theories; demand for pediatric care; economic models of the determinants of adult, child, and infant health; and the production and cost of ambulatory medical care in community health centers. Xavier Sala-i-Martin , PhD from Harvard and Professor at Columbia University and Pompeu Fabra University is a major expert in macroeconomics with important contributions in the field of growth, globalisation, inequality and development. He is one of the winners of the Arrow Award in 2001 and one of the contributors to the new book on Health and Economic Growth to be released by MIT Press during our Conference. Indira Hirway is a distinguished professor in Economics with important contributions to the field of Labour and Economic Growth. She has done research at The Gandhi Labour Institute and since 1998 she directs the Center For Development Alternatives, an Academic Research Unit at Ahmedabad (India). Poverty and unemployment, labour market structures and human development and safety nets are her main research areas.

Other methodological and normative dilemmas arise from the robust finding of almost-complete hedonic adaptation to some health states. Daniel Kahneman (Princeton University, USA) was born 1934 in Tel Aviv, Israel. In 1954, he received his B.A. in Psychology and Mathematics from the Hebrew University, Jerusalem, and in 1961, his PhD in Psychology from University of California at Berkeley. Since 1993, he has been the Eugene Higgins Professor of Psychology and Professor of Public Affairs in the Woodrow Wilson School of Public and International Affairs at Princeton University. He shared the 2002 Nobel Prize in Economics (formally known as the Bank of Sweden Prize in Economic Sciences in Memory of Alfred Nobel) with Vernon L. Smith (George Mason University, USA). Dr. Kahneman was recognized for having "... integrated insights from psychology into economics, thereby laying the foundation for a new field of research. Kahneman's main findings concern decision-making under uncertainty, where he has demonstrated how human decisions may systematically depart from those predicted by standard economic theory. Together with Amos Tversky (deceased in 1996), he has formulated prospect theory as an alternative that better accounts for observed behavior. Kahneman has also discovered how human judgment may take heuristic shortcuts that systematically depart from basic principles of probability. His work has inspired a new generation of researchers in economics and finance to enrich economic theory using insights from cognitive psychology into intrinsic human motivation."
