Welcome to the 6th World Congress of Health Economists!

Dear Colleagues,

On behalf of all who have made this 6th World Congress of Health Economists possible, welcome to Denmark and Sweden, to the universities of Lund and Southern Denmark.

This is the first iHEA congress to be co-hosted by two different countries and we anticipate that this will provide a fresh perspective on the health economics profession, hence the theme of the conference, 'Explorations in Health Economics.' Copenhagen is a medieval city with a dynamic cosmopolitan air. We think that you will find it a perfect setting to consider the future of health economics while drawing on lessons of the past. We hope that you will take the opportunity to share views and experiences – both in and out of the lecture rooms – which will be offered to our academic community in both Copenhagen and Lund.

Three stimulating plenary sessions will be offered. The opening features Ulla Schmidt, German Minister of Health who will speak on the re-organization of health care financing and service delivery underway in her country. The second will take place at the world famous Tivoli Gardens and will feature Tomas Philipson, who won the 2006 Arrow Award for his paper with Gary Becker and Rodrigo Soares, and the 2000 Arrow Award for his paper with Will Dow and Xavier Sala-i-Martin. He will speak on economics and end-of-life care. Finally, Jane Hall, iHEA president will close the congress on Wednesday reflecting upon the current state of health economics research.

Special thanks must go to the iHEA Board, the Host Organizing Committee and all those who have worked behind the scenes – our public and private sponsors, the Scientific Committee, volunteer groups, and CBS and Lund officials.

We hope you enjoy your time at the congress. We also hope that you will find time to relax and explore the Oresund region.

Enjoy the Congress!

Dear Colleagues,

The 7th World Congress on Health Economics will be hosted in the newly minted Olympic city of Beijing in July 2009. For the first time, iHEA will gather beyond the gambit of Europe and North America, joining the rising tide of scientific and economic progress in Asia.

The theme *'Harmonizing Health and Economics'* will provide ample opportunity to reflect on the many ways health economists can work together with medical professionals and politicians to create continuous improvements in the health of populations.

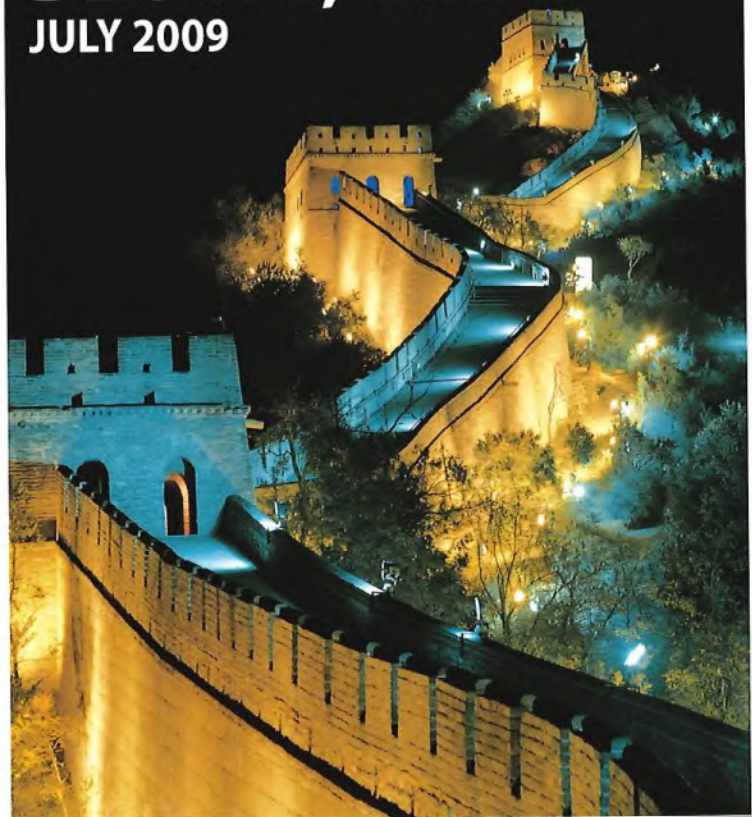

In the spirit of these historic Olympic games we also hope that this conference will engender a heightened sense of international cooperation in health economics.

We look forward to hosting you
in our capital city.

Sun Lungchun,
President of Chinese Health
Economics Association

turning knowledge into practice

For over 45 years, we have helped our clients address major health economic and public health issues through innovative research, expert technical assistance, and effective decision support.

We offer:

- Over 80 health economists focusing on public health, reimbursement policy, substance use, pharmacoeconomics, international development, and health care reform. With hundreds of staff in related fields, we build multidisciplinary teams to study complex problems in health.
- Industry-leading methods in econometrics, cost-effectiveness research, conjoint analysis, policy design, and health care claims analysis.
- Expertise in information capture, processing, analysis, and dissemination.
- The RTI-UNC Center of Excellence in Health Promotion Economics, dedicated to uniting health economics with public health practice.

Health Innovation Program

Integrating healthcare research and practice

The Health Innovation Program (HIP) at the University of Wisconsin-Madison, School of Medicine and Public Health aims to inspire and support improvements in healthcare delivery that achieve safe, timely, effective, equitable, efficient, and patient-centered care.

To achieve this goal, HIP faculty and staff conduct research that translates best evidence into best practice, integrate research with improvement initiatives, and create educational and outreach activities to build leadership and enhance innovation in healthcare delivery.

We are currently recruiting for both faculty and staff positions associated with HIP.

For further information, please visit the HIP website, www.hip.wisc.edu, or email Maureen Smith, MD, PhD, MPH - Faculty Director, maureensmith@wisc.edu

International doctoral courses in health economics and policy

Advanced courses in health economics and policy for regular PhD students

Students enrolled in the program will pursue a PhD program in economics in their own university and benefit from the health economics and policy focused program offered by the SSPH+ as a specialisation program.

Participants can be of two types:

- Students registered at one of the Swiss Universities (Basel, Bern, Geneva, Lausanne, Lugano, Zurich) as a regular PhD student. The courses are part of the Doctoral program of these universities.
- PhD students from universities outside Switzerland can attend courses of their choice among those offered with the agreement of these universities to include them in their doctoral program.

Successful applicants to the PhD program will have to fulfil the admission requirements for the doctoral program in economics at the university granting the title they pursue.

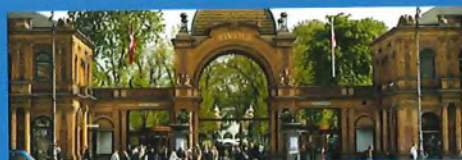

A program offered by:

The International Network for Health Care Research

The **aegisnet** network is an innovative, integrated group of companies. All companies have an established reputation in the fields of health economics, outcomes research, pricing, reimbursement and market access.

The services offered by **aegisnet** facilitate a global perspective supported by country-by-country expertise. **aegisnet** members are highly skilled and experienced consulting companies who have local, in-depth knowledge of their country's market access regulations and requirements, and understanding of the international health technology market. Each company has senior staff members who are experienced in the management of international projects. Many have worked in the international HQ of medical technology companies and all appreciate the importance of devising and implementing global strategy alongside support of local country needs. Our unique service thus ensures local relevance within global strategies. We take pride in the high quality, value-added service, which we work together to achieve.

GLOBAL STRATEGIES, LOCAL IMPLEMENTATION

THE COMMONWEALTH FUND IS PLEASED TO INVITE APPLICATIONS FOR THE 2008-09 HARKNESS FELLOWSHIPS IN HEALTH CARE POLICY AND PRACTICE

The Harkness Fellowships provide a unique opportunity for mid-career professionals—academic researchers, government policymakers, clinicians, managers, and journalists—from Australia, Germany, the Netherlands, New Zealand, and the United Kingdom, to spend up to 12 months in the United States conducting a policy-oriented research study, working with leading U.S. health policy experts, and gaining an in-depth knowledge of the U.S., U.K., Australian, Canadian, Dutch, German, and New Zealand health care systems.

All applicants must submit a formal application that includes a research proposal which falls within the scope of The Fund's principal areas of focus: health care system performance, including access to care, insurance coverage, quality improvement, efficiency, and equity; quality of care for children, the elderly, and minorities; and patient-centered primary care. Selected fellows will participate in high-level seminars and workshops organized by the Fund, and are expected to present a peer-reviewed journal article or report to Health Ministers and policy makers at the end of their fellowship.

The Fund will provide extensive support to successful Fellows to help them develop and shape their research proposals to better fit the context of the U.S. health system. Through its network of contacts, the Fund will help identify and place Fellows with mentors who are experts in the policy areas to be studied, e.g., at Harvard University, Stanford University, University of California at San Francisco, Johns Hopkins University, Kaiser Permanente, Veterans Health Administration, Institute for Healthcare Improvement (IHI), RAND, Agency for Healthcare Research and Quality, and Group Health Cooperative at Puget Sound.

A peer-reviewed journal article or policy report for Health Ministers and other high-level policy audiences is the anticipated product of the fellowship. Harkness Fellows have published their findings in leading journals, including: British Medical Journal, Health Affairs, Health Policy, International Journal for Quality in Health Care, New England Journal of Medicine, and Quality and Safety in Health Care.

Building on their fellowship experiences, Harkness Fellows have moved into senior positions within academia, government, and health care delivery organizations, making valuable contributions to health policy and practice at home and in the United States. In addition, Harkness Fellows become part of a strong international network, with opportunities for ongoing cross-national collaborations and research.

Applicants must be citizens of Australia, Germany, the Netherlands, New Zealand, or the U.K. (in the U.K., citizens of other countries with permanent residency and five or more years tenure in the U.K. may also apply).

DEADLINES FOR RECEIPT OF APPLICATIONS FROM THE U.K., AUSTRALIA, GERMANY, and NEW ZEALAND is SEPTEMBER 4, 2007. THE DEADLINE FOR APPLICATIONS FROM THE NETHERLANDS IS NOVEMBER 30, 2007.

Each fellowship will provide up to U.S. \$107,000 in support, which includes round trip airfare to the United States, a monthly stipend, travel to a program of Harkness seminars and policy briefings, project-related travel and other research expenses, health insurance, and U.S. taxes. In addition, a supplemental allowance is provided to Fellows accompanied by a spouse and/or children.
