PRIME MINISTER . PREMIER MINISTRE

I am pleased to extend my warmest greetings to everyone attending Transforming Health & Economics: the 8th World Congress on Health Economics, and to welcome all of the international delegates who have travelled to Toronto for this conference.

Recognizing that the burden of poor maternal health and high child mortality constrains the prosperity of many countries, Canada announced last year the Muskoka Initiative to improve maternal and child health in developing countries. This is but one example of how ill health imposes significant economic costs on society. Your efforts to add economics to the discussion of health and health care are important to our understanding of the challenges faced, and to our ability to manage them successfully.

I commend the members of the International Health Economics Association for bringing a high standard of debate to the application of economics to health and health care systems. I am certain that everyone attending this conference will be inspired by the strategies presented here.

Please accept my best wishes for a productive and memorable meeting.

July 10 – 13, 2011

A PERSONAL MESSAGE FROM THE PREMIER

On behalf of the Government of Ontario, I am delighted to extend warm greetings to everyone attending Transforming Health and Economics: The 8th World Congress on Health Economics, hosted by the International Health Economics Association (IHEA).

As Premier of Ontario, I understand the importance of health care economics and the need for supporting research and innovation in this field. With leading health economists and experts from over 70 countries sharing their ideas, I am confident that IHEA members will find this conference stimulating and thought-provoking. I commend your commitment to deepening the discussion of the important and timely issues raised at this year's congress.

If this is your first time in Toronto or if you are a returning visitor — I am pleased to welcome you to the provincial capital. I hope you find the time to enjoy some of the outstanding attractions and unique events the city has to offer.

Please accept my best wishes for an informative and productive congress.

A Message from the Mayor

It gives me great pleasure to extend greetings and a warm welcome to everyone attending Transforming Health & Economics: 8th World Congress on Health Economics hosted by the International Health Economic Association (iHEA).

The International Health Economics Association focuses on assisting young researchers new to the field by facilitating communication among health economists and fostering a higher standard of debate in application of economics to health and health care systems.

At this congress, delegates will network with peers and participate in sessions by leading experts in health economics where new ideas and better decisions will be explored.

On behalf of Toronto City Council, please accept my best wishes for an informative and enjoyable conference.

Yours truly,

**Mayor Rob Ford
City of Toronto**

CORNERSTONE RESEARCH

Welcome from the Congress Chair

Greetings!

On behalf of the local organizing committee of the 8th World Congress of the International Health Economics Association, I welcome you to Toronto, a city that derived its name from a word in the local Huron dialect meaning “place of meetings.” So, it is appropriate that we are meeting together in an emerging world-class city.

In thinking about the conference theme – Transforming Health and Economics – I can’t help but be struck by the coincidence of convening our congress during a pivotal year in the field of health economics. This is the year in the West that the post World-War II “baby boom” begins to turn age 65. The issues surrounding this trend have been a major part of the literature for the last two decades. It is now time to begin to turn our attention 30 years into the future when the number of “boomers” begins to decrease, and issues regarding excess capacity and the need for retraining labor, among others, will predominate.

Moreover, the fact that the global economy continues to struggle to emerge from the financial crisis of 2008 brings another set of challenges for the financing and delivery of high quality health care. Fortunately, the tremendous growth of our discipline has shown that we can collectively develop the tools and expertise necessary to investigate the potential implications of different strategies and insightfully inform policy. The iHEA meeting plays an important role in this regard since it provides a forum for debating ideas, building the technical know-how of our field and sharing lessons from policy experiments around the world.

Aside from the conference proceedings, we also hope that you will find time to explore the city and area attractions. Whether your interests lie in the arts, sports or nature, there are innumerable choices available. Toronto has experienced a cultural renaissance with recent expansions and renovations of the Royal Ontario Museum and The Art Gallery of Ontario (which you will visit as part of our program) and the new Four Seasons Centre for the Performing Arts. Toronto is also home to the Toronto Blue Jays major league baseball and Toronto FC soccer teams. Farther afield is Niagara-on-the-Lake home of the Shaw festival, Niagara Falls and Stratford, home of the Shakespeare festival, are all an easy drive from Toronto.

In sum, there is much to fill your days during your visit to our city. Please don’t hesitate to ask any of the volunteers in “iHEA shirts” for directions and for other information. We look forward to helping to make your meeting productive and your stay with us both memorable and enjoyable.

With pleasure,

Eric Nauenberg, Ph.D.

WCRI EMPLOYMENT AND FELLOWSHIP OPPORTUNITIES

Senior Health Economist / Public Policy Researcher

WCRI has several openings for health economists and public policy analysts at the M.A. and Ph.D. levels. Successful applicants have the opportunity to work on a wide range of empirical studies as well as access a unique database that includes over 30 million episodes of disability and patient outcomes data from nearly 10,000 interviews. Opportunities also exist to publish in the WCRI peer-reviewed monograph series and other recognized academic journals.

John Jones Scholar

The John Jones Scholar in Workers' Compensation Research provides young scholars with an opportunity to explore this rapidly expanding field of research. Successful candidates receive a grant of \$10,000 for new research projects, dissertation support, or a Scholar-in-Residence at WCRI. Past recipients include junior faculty and Ph.D. candidates from well-known institutions, such as the University of California at Berkeley, University of Maryland, and Stanford University.

Powerful

It's not just a word, it's the strength of the data.

Millions of discharges, thousands of hospitals, and dozens of clinical and non-clinical data elements make the Healthcare Cost and Utilization Project (HCUP) the largest collection of multi-year, all-payer health care data in the U.S. Sponsored by the Agency for Healthcare Research and Quality (AHRQ), HCUP's health care databases, software, and products provide the tools for cutting-edge research and policy analyses. Rely on the power of HCUP to help answer your most important research questions.

Dr. Feldstein is a member of the American Philosophical Society, a Corresponding Fellow of the British Academy, a Fellow of the Econometric Society and a Fellow of the National Association of Business Economics. He is a Trustee of the Council on Foreign Relations and a member of the Trilateral Commission, the Group of 30, the American Academy of Arts and Sciences, and the Council of Academic Advisors of the American Enterprise Institute.

Dr. Feldstein has received honorary doctorates from several universities and is an Honorary Fellow of Nuffield College, Oxford. In 1977, he received the John Bates Clark Medal of the American Economic Association, a prize awarded every two years to the economist under the age of 40 who is judged to have made the greatest contribution to economic science. He is the author of more than 300 research articles in economics.

Adam Wagstaff is Research Manager of the Human Development & Public Services team in the Development Research Group. He holds a DPhil in economics from the University of York (U.K.). Before joining the Bank, he was a Professor of Economics at the University of Sussex.

He was an associate editor of the *Journal of Health Economics* for 20 years, and has published extensively on a variety of aspects of the field, including: health financing and health systems reform; health, equity and poverty; the valuation of health; the demand for and production of health; efficiency measurement, and illicit drugs and drug enforcement. Much of his recent work has been on health insurance, health financing, vulnerability and health shocks, and provider payment reform. He has extensive experience of China and Vietnam, but has worked on countries in Africa, Latin America, S Asia, and Europe and Central Asia, as well as other countries in E Asia. Outside health economics, he has published on efficiency measurement in the public sector, the measurement of trade union power, the redistributive effect and sources of progressivity of the personal income tax, and the redistributive effect of economic growth.

Sherry Glied

Sherry Glied was sworn-in as the Assistant Secretary for Planning and Evaluation at the U.S. Department of Health and Human Services on July 1, 2010. Previously, Glied was department chair and professor in the Department of Health Policy and Management of Columbia University's Mailman School of Public Health. In 1992-1993, she served as a senior economist for health care and labor market policy on the President's Council of Economic Advisers under Presidents Bush and Clinton, and participated in the Clinton Health Care Task Force. She has been elected to the Institute of Medicine of the National Academy of Sciences and to the Board of AcademyHealth. She was a member of the Congressional Budget Office's Panel of Health Advisers.

Glied's principal areas of research are in health policy reform and mental health care policy. Her book on health care reform, *Chronic Condition*, was published by Harvard University Press in January 1998. Her latest book, with Richard Frank, is *Better But Not Well: Mental Health Policy in the U.S. since 1950*, which was published by The Johns Hopkins University Press in 2006.

Glied holds a B.A. in economics from Yale University, an M.A. in economics from the University of Toronto, and a Ph.D. in economics from Harvard University.

www.PolicyMatters.ca, a place for diverse voices to have informed and transparent dialogue on a range of policy issues that affect our healthcare system, is supported by Amgen Canada Inc.

Featuring expert perspectives on a given topic and opportunity for comment, PolicyMatters.ca is an inclusive space that we hope will trigger debate, bring together diverging opinions and facilitate solutions.

Reimbursement decision-making for pharmaceutical products is complex. Traditional health technology assessment (HTA) principles review the clinical and cost-effectiveness of drugs to facilitate the reimbursement decision-making process. However, these principles do not necessarily account for other more complex variables, such as severity of the disease, unmet needs, patient experiences and societal benefits related to the disease area and patient population. How might we create a novel framework that allows decision-makers to account, in a structured or rigorous manner, for some of these qualitative measures to complement the traditional HTA?

Young Researchers in Health Network

Inaugural Meeting

Join the Founders!

Why?

Take part and get in touch with different health care systems, methodological trends, political discussions, and approaches from various health-related sciences. This Network promotes cooperation among young researchers in health, fosters exchange of ideas and experiences, assists in publishing results, organises workshops and seminars and hence furthers the knowledge and understanding of the multi-faceted drivers that affect health.

When and Where?

Tuesday July 12th 2011 at 1.15pm, Grand Ballroom East

We are looking forward to meeting you.

Bestselling Textbook now in 2nd Expanded Edition!

Who Shall Live?

Health, Economics and Social Choice

by Victor R Fuchs (Stanford University, USA)

Fuchs returns to and expands on themes that have earned him a well-deserved reputation as both a great health economist and the most insightful health policy analyst on the current scene... His proposal for health care reform remains the most attractive solution.

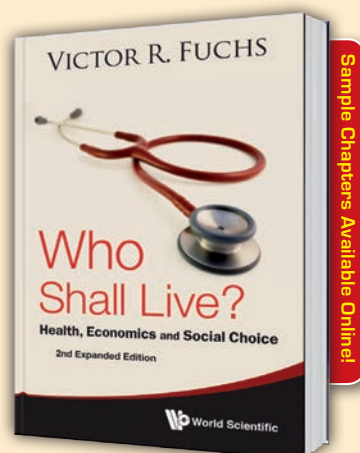

Michael Grossman, CUNY Graduate Center

This is deservedly a classic book...Its analysis, accessibility, and lucidity of exposition are as fresh as four decades ago...There is a spiffy new introduction that gives Fuchs' reflections on the events of the intervening years.

Joseph P. Newhouse, Harvard University

In this classic book, Professor Victor Fuchs draws on his deep understanding of the strengths and limitations of economics and his intimate knowledge of health care institutions to help readers understand the problems every nation faces in trying to allocate health resources efficiently and equitably. In a new Introduction to the second expanded edition, Professor Fuchs examines the major changes in health, medical care, and U.S. health policy of the past four decades. Nine of his more recent papers dealing with poverty and health, aging, the socio-economic correlates of health, the future of health economics, and his recommendations for health care reform accompany the original 1974 text.

CIHR- Institute of Health Services and Policy Research (CIHR-IHSPR)

CIHR-IHSPR's vision: Outstanding health services and policy research to improve health system outcomes.

CIHR-IHSPR's mandate: Championing and supporting excellent health services and policy research and knowledge translation.

Watch for: CIHR Signature Initiatives in Community-Based Primary Healthcare (CBPHC) and Evidence-Informed Healthcare Renewal (EIHR).

CIHR ROADMAP SIGNATURE INITIATIVE IN EVIDENCE-INFORMED HEALTHCARE RENEWAL

Ever-increasing cost pressures, attention on the upcoming expiration of the 2004 Health Accord, and an appetite for new models of financing and delivering care, have created an **exciting opportunity for researchers and decision makers to contribute to healthcare renewal in Canada.**

The Canadian Institutes of Health Research's new Evidence-Informed Healthcare Renewal (EIHR) initiative will support researchers and decision makers to work together to **advance the current state of knowledge, generate novel and creative solutions, and translate evidence for uptake into policy and practice to strengthen Canada's healthcare systems.**

The EIHR initiative focuses on **three priority areas: financing and funding models; health system sustainability; and governance and accountability.** Innovation in these areas will require contributions from a wide range of disciplines and methodological approaches. Health services and health policy research would greatly benefit from contributions from **economics, political science, sociology, philosophy, law, and other relevant fields**, and from the involvement of **policy makers, decision makers and healthcare providers.**

Within its three priority areas, the EIHR initiative supports **original research** and **synthesis of existing knowledge, builds research capacity, and facilitates knowledge translation.** It includes a variety of funding tools, including Partnerships for Health System Improvement grants, Knowledge Synthesis grants, Policy Analysis grants, Fellowship Awards, and Post-doctoral Awards.

To learn more about the EIHR initiative, including upcoming funding opportunities in June 2011 and Fall 2011, priority research areas, and other important news, contact Michael at Michael.Rajendram@cihr-irsc.gc.ca or Meghan at Meghan.McMahon@utoronto.ca.

CIHR ROADMAP SIGNATURE INITIATIVE IN COMMUNITY-BASED PRIMARY HEALTHCARE

The Canadian Institutes of Health Research – Institute of Health Services and Policy Research (CIHR-IHSPR) and its partners are launching a multi-year initiative to fund research that supports the delivery of high-quality, community-based primary healthcare (CBPHC) across Canada. A strong foundation of research evidence in CBPHC – the first and most frequent point of contact with the healthcare system – is key in helping to achieve better health outcomes, improved equity, an overall enhanced patient experience, and other system-wide benefits.

This CIHR Roadmap Strategic Initiative in CBPHC will support researchers to conduct original research, build capacity, and translate evidence for uptake into practice and policy through two major funding tools:

- **CBPHC Team Grants** will support inter-disciplinary, cross-jurisdictional teams of researchers to conduct excellent research and provide superior research training and mentorship across two key research priorities:
 - ♦ Chronic Disease Prevention and Management in CBPHC
 - ♦ Access to Appropriate CBPHC for Vulnerable Populations
- **CBPHC Scientist Awards** will provide outstanding CBPHC providers with support to conduct, translate, and use practice-relevant research

Give your students the perfect primer for the economic analysis of medical markets.

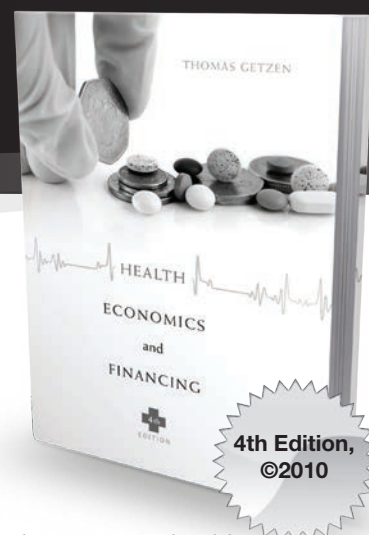

Health Economics and Financing introduces students of medicine, business, public health, policy and administration to the principles and core concepts of health economics—without extensive mathematics or highly technical analytical techniques. Authored by Thomas E. Getzen, Executive Director of iHEA, Professor at Temple University, and Associate Editor of the *Health Economics* journal, this resource draws upon the work of the field's top scholars and includes rich information about institutional features as well as comparisons of health and medicine to other economic goods.

Features of the 4th Edition:

- **A presentation of basic economic principles** followed by a detailed investigation of medical care organization, financing, transactions, historical development, and long-term consequences.
- **A wider macroeconomics perspective** exploring the dynamics of change within the health care system, determinants of national health spending, the role of government, and international comparisons.
- **Current issues:** The domestic reforms in health care and

medical financing in the U.S., the emerging health care system in China, and path dependence.

- **Case studies and investment cases:** C-B and CEA, linkage to demand curves distinguishing marginal from average benefits, and ROI of specialty medical education.
- **Resources** available on the instructor and student companion websites, including instructor's manual, test bank with 200+ quantitative and qualitative problem sets, appendices, PowerPoint® slides, and practice quizzes.
